## PLEASE NOTE

All orders whether large or small given our careful attention.

All orders of \$2.00 or more shipped prepaid unless otherwise stated. If less than \$2.00, please add 25c extra for packing and shipping charges. It costs us just as much to put up a dollar order as it does a two dollar order, is the reason we ask this.

### OR IF YOU WISH

you may take advantage of the following special offer:

Order the plants to be shipped collect for the transportation charges and we will include extra plants to more than equal the amount of the carrying charges. We have considerably more bulbs, plants, etc. than we do money is the reason for this offer.

While the charges on any one package are not much, when it comes to an entire season's orders the postage is considerable.

We like to be liberal when filling orders but, when we have to pay the postage on all extras, it only adds to the shipping charges and cuts down on our already slim profits.

Often times when the customer pays the charges, much larger plants and more liberal count can be given than where we have to pay the charges. **HOWEVER, REMEMBER THIS:** we give liberal count, good size and quality, careful selection and guarantee your money's worth no matter who pays the transportation. We ship as light as possible to insure low rates and, at the same time, carefully to insure good arrival of plants. Nursery stock now takes second class rates by express. These rates are about the same as postage. Order your plants and bulbs shipped this way. We guarantee satisfaction.

### BE SURE TO TELL US HOW TO SHIP. GIVE EXPRESS STATION

During the past season many customers have availed themselves of the above offer and have written to tell us how well pleased they were with the extra plants sent them.

C.O.D. customers should inclose 25% of order to insure acceptance. You stand C.O.D. charges.

Growers and dealers, wishing large quantities, will please send us their lists for quotations.

Special premiums on f.o.b. or collect orders: 3 packages of nice perennial flower seeds with every \$2.00 order. 12 Medium size Regale Lilies with \$3.00 f.o.b. orders. 12 Extra large Regale Lilies with \$5.00 f.o.b. orders. 12 Extra Large Regale Lilies and 12 Betty Nuthall Glads with \$7.50 f.o.b. orders. 12 Extra Large Regale Lilies, 12 Large Betty Nuthall Bulbs, 12 Aflame, and 12 Bertie Snow Glads with \$10.00 f.o.b. orders. The above premiums are given besides the regular extras that are sent to help pay the transportation.

**CULTURAL DIRECTIONS**—Upon receiving your chrysanthemum plants you should place them in water for a couple of hours or until they straighten up.

They should be planted 18 inches apart in soil enriched with well rotted cow or sheep manure. A four foot stake placed by the plant will do to tie the plant to when it becomes larger. When the plant has attained the height of eight inches the center should be pinched out. This causes the plant to branch. When this happens again pinch out the centers. The branches which now form should be allowed to set buds. Thin these buds to one bud to the branch. (Do not disbud the Button and Pompom types.)

Chrysanthemums need rich soil and plenty of water. During the summer each plant should have about a half cup full of dry sheep manure worked in around the plant every 10 days until the buds appear. After buds appear, liquid fertilizer should be used. A cup full of sheep manure to four gallons of water applied liberally twice a week until buds begin to show color. After this fertilizing should cease. The less buds left to the plant, the larger will be the individual flowers. Most florists leave two, however good results may be had by leaving from four to eight.

If you have much rainfall or early frosts in the fall it would be well to put up a light frame work of canvas over them.

## ANNUAL FLOWER PLANTS

We have added the following list of annuals to our list this year. This list is quite complete, and contains many of the newer dwarf Phlox, Verbenas, Snapdragons, Candytufts, Petunia Minature Gem, Dwarf Bouquet Asters, and also Lobelias and Ageratums. These dwarf plants are all excellent edging plants for the border and to fill in the Rock Garden.

We purchased the best seed that money could buy.

Plants should be ready for shipment by April first.

Prices are 20c per dozen plants of one kind, unless otherwise noted. 6 dozen plants for \$1.00. 25c varieties are 5 dozen for \$1.00.

PLEASE include 15c extra for postage on orders for annuals to be shipped alone if your order is less than \$1.00.

# GERMAN IRIS

## NEW AND STANDARD VARIETIES

Irises are one of the most satisfactory border plants. They are reasonable in price, easily grown, do not require much care, will stand much neglect and require very little water, once they are established.

Irises are now very much in vogue, and you will love and enjoy the many new and iridescent shades which are to be found in them.

The descriptions given here are very inadequate on account of lack of space. A half page would be necessary to do justice to many of these beautiful flowers.

S. means standard or upright petals.

F. means falls or the recurved part of the flower.

We have 100 other varieties in too small quantities to list, so, if you don't find the variety you want, write and ask us about it.
